## **PROJECTS**

### **PROJECT WORK: - WEATHERMAN**

My major project in the online summer training is named "WEATHERAMN" and it is based on REACT framework which uses node modules for its proper functioning. It is an open-source framework more popular for single-page applications. It also uses HTML, CSS, Bootstrap and Javascript for proper display and functioning. It uses API Integration for backend purpose.

### **PROJECT WORK: - RESUME FILTERING**

We designed a technical project in a team of 5 by using HTML5, CSS, JavaScript. Project was based on the fact that we have number if resumes and our site help to filter the necessary details and represent it in a tabular format with a column containing link to each resume.

### **PROJECT WORK: - ACTIVITY PLAN MANAGER**

This is the final year project I made in college. This project aim is to help teachers and students make their work efficient by providing proper tools for planning, making strategies and for activities that can help them to accomplish their task. I have used VS Code Editor, MongoDB, Express, ReactJS, NodeJS in this project.

## **INDUSTRIAL TRAINING**

**Organization :** Cipher School

**Duration :-** 14 May 2020 – 28 June 2020 (45 days)

**Description:**

Full Stack Using MERN Stack Training in which we have learnt about HTML , CSS, JavaScript, Bootstrap, React, Node.js etc.

**Organization :** Celebal Technologies

**Duration :-** 25 May 2021 – 15 July 2021

**Description :** Web Development Internship in which we have worked on HTML , CSS , JavaScript and how to design a attractive web page by using various tools such as react, bootstrap and API etc.
